

### **Information on the Screen and Projector**

The work and equipment will be provided by **AV Installations, Harlow**. They have been in business for over 25 years. They will make the bespoke brackets to fit the equipment in position.

#### **A 1.5 metre electric 16:10 ratio projection screen**

The photo shows the rough position when the screen is down. It will be operated by an infra-red remote control. The screen will be pulled out and positioned manually.

#### **Panasonic Laser 7000 lumen laser projector**

The photo shows the estimated position of the Projector. The exact position cannot be ascertained until the screen is in position.

All power and data cables will be discreetly hidden where possible.

Working at Height regulations will be followed.
